

# global seedlings

## Live Conifer (Evergreen) Tree Seedlings

Global Seedlings provide premium conifer seedlings in clear poly bags or clear tubes. The bio-degradable poly bags are ideal for special events, business generating initiatives, open houses, fundraising and a variety of other applications. Our attention-grabbing clear tubes can be presented by hand or placed in the mail.

### Help Reduce Global Warming with Global Seedlings

Our environment needs everyone's help. Trees help reduce global warming by absorbing carbon dioxide, a "green house" gas. Live conifer (container) seedlings will be one of the hottest promotional products for the coming decade. Work with the largest grower of container conifer seedlings in North America to make sure your clients are actively involved in this era of environmental responsibility.

Regular Package (tag extra)

NO CHARGE  
FULL COLOR  
PRINTED  
LABELS

#GS2034 Clear 1.5" x 12" tube with black caps. Tube can be used for mailing or as a handout. Add \$1.791 (E). Full color 2" x 4" waterproof label included.

Container (plug) seedlings have a higher survival rate than traditional bareroot seedlings which make them better for shipping. Our trees are grown in peat for seedling longevity and ease of planting. Blue Spruce is the most widely used promotional seedling and is ideal for potting.

We grow over 100 million seedlings annually!
